APN Customer reviews:

## Henrik Tufvasson, Nitton93

Epical did quickly understand the root cause of the problems and challenges that Nitton93 faced with regard to keeping track of goods between suppliers and the warehouses. Easy access to consultants and rapid actions during development as well as fixing minor flaws and updates after go-live. And we are overall very happy with the application in terms of usability and its smooth operation. It has helped us a lot to become more efficient.
